Contents

Preface	vi
Acknowledgments	viii
List of Tables	ix
1 Mathematical background	1
1.1 Differential operators on the sphere	1
1.1.1 Spherical coordinates	1
1.1.2 Partial derivatives	2
1.1.3 Gradient	3
1.1.4 Divergence	3
1.1.5 Curl	3
1.1.6 Laplacian	4
1.2 Complex Spherical Harmonics	4
1.3 Properties of Y_{lm} , P_{lm} , and P_l	5
1.3.1 Properties of Y_{lm}	5
1.3.2 Properties of P_{lm}	6
1.3.3 Properties of P_l	7
1.4 Spherical harmonics expansions of scalar fields	10
1.4.1 CSH expansion	10
1.4.2 RSH expansion	12
1.4.3 FNSH expansion	14
1.4.4 LEG expansion	15
1.4.5 Summary conversion Tables	17
1.5 Ocean function	18
1.5.1 Ocean function low-degree RSH coefficients	20
1.6 Time and Laplace domains	20
1.6.1 Time histories	21
1.6.2 Laplace transforms	21
1.6.3 Time convolution	22

2	Displacement and Gravity	25
2.1	Toroidal–Poloidal decomposition of displacement	25
2.1.1	CSH expansion of the displacement field	26
2.2	The gravity field	27
2.2.1	Gravity and gravity potential	28
2.2.2	Inertia tensor	29
2.2.3	Center of mass	30
2.2.4	Stokes coefficients	30
2.2.5	Low–degree Stokes coefficients	33
2.2.6	Potential perturbation and geoid height	37
2.2.7	Stokes coefficients variations	41
2.2.8	Inertia tensor variations	43
3	Surface loads	45
3.1	General properties	45
3.1.1	Definition	45
3.1.2	Dynamic and static load mass	46
3.1.3	Balanced loads	47
3.1.4	AX and NAX surface loads	48
3.1.5	Expansion of the NAX load function	49
3.2	Two useful NAX loads	50
3.2.1	Rectangular load	50
3.2.2	Ocean surface load	52
3.3	AX loads	53
3.3.1	Unit load	55
3.3.2	Disc load	57
3.3.3	Balanced disc load	58
3.3.4	Parabolic load	60
3.3.5	Balanced parabolic load	63
3.3.6	Harmonic load	65
4	Response to surface loads: displacement and geoid height	67
4.1	Equilibrium of an elastic Earth	67
4.1.1	Extension to viscoelasticity	71
4.2	Response to an impulsive unit load	73
4.2.1	Load–deformation coefficients	73
4.2.2	Form of the LDC	74
4.3	Viscoelastic response formulas for AX loads	76
4.3.1	Response to AX loads in the LRF	76
4.3.2	Response to AX loads in the GRF	77
4.4	Viscoelastic response formulas for NAX loads	79

4.4.1	Response to NAX loads in complex form	80
4.4.2	Response to NAX loads in real form	81
4.4.3	AX response as a particular NAX response	82
4.5	Ocean corrections	83
5	Response to surface loads: Stokes coefficients and inertia variations	87
5.1	Stokes coefficients variations	87
5.2	Inertia variations	89
6	Response to surface loads: baselines variations	93
6.1	Baseline unit vectors	93
6.2	Baseline rates	95
7	Appendices	97
7.1	Time-histories and their derivatives	97
7.1.1	$f_0(t)$: Instantaneous loading	97
7.1.2	$f_1(t)$: Instantaneous un-loading	98
7.1.3	$f_2(t)$: Instantaneous loading and un-loading	98
7.1.4	$f_3(t)$: Simple deglaciation	98
7.1.5	$f_4(t)$: Saw-tooth	98
7.1.6	$f_5(t)$: Sinusoidal loading	99
7.1.7	$f_6(t)$: Piecewise linear	100
7.1.8	$f_7(t)$: Piecewise constant	100
7.1.9	$f_8(t)$: Piecewise constant with loading phase	101
7.2	Time convolutions and their derivatives	101
7.3	Glossary	105
	Bibliography	106
